Group Rooms

Study Space Finder

At the Office of Classroom Management (OCM), we strive to enhance students' learning experiences. Over the last year, we contributed to the development and launch of Study Space Finder.

Together with University Libraries, Student Unions, OIT, AHC Classroom Services, and University Services, we connected the Twin Cities campus by offering students a responsive website where they can find places to study. Map pins and images make it easy for students to find comfortable spots to learn, whether they want group study rooms, computer labs, or coffee shops.

Study Space Finder will have more spaces and improvements in the coming year, and we are excited to continue enhancing students' learning experiences on campus!

"Let me start by saying I love this feature; I am always looking for new places to study. Thanks for creating this tool!" - student

OCM Website

On October 3, 2017, we launched a new website built within the latest content management system, Drupal 8. We made the design clean and simple, so content would be easy to find for our large and varied audience. Responsive design and condensed information provides a fresh experience for users and an easier way to maintain and update information. Since the launch of the new website, we have had more than 21,400 homepage views!

"It looks modern, works well on mobile, and has lots of good content. Nicely done." - staff

"It is very intuitive and user friendly. I love the new, sleek design. I also think the Study Space Finder tool is really cool. Nice job!" - staff

Tate Hall

The John T. Tate Hall renovation was a large, multi-million dollar project that involved many campus units and lasted from June 2015 to September 2017. All areas of OCM took part in the project. Among the many tasks that needed to be done, staff stayed on top of scheduling rooms, designing new audio and visual components, and delivering quality customer service and operations. In the building, we oversee 10 general purpose classrooms with a total capacity of 961 seats.

Our Spaces

MINNEAPOLIS

SAINT PAUL
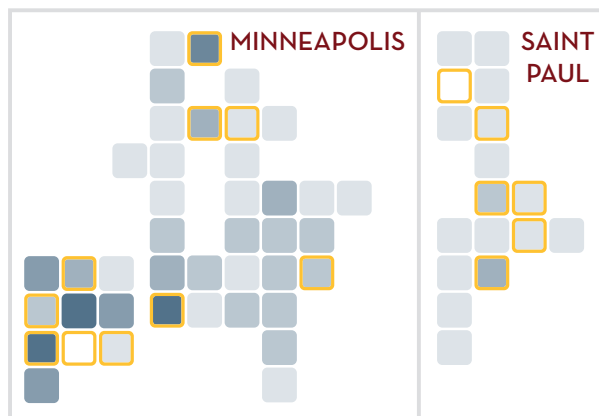

As a national leader in the coordination and operation of classrooms, we are driven to provide the best possible learning experiences to our students, faculty, staff, and visitors. To date, we manage 374 learning spaces across the University of Minnesota's Twin Cities campus.

each square represents about 10,000 square feet

38,672 square feet of study space
+4,311 sq ft increase from 2012

Student Impact

9,749 Average Hours of academic use per week in OCM supported classrooms

9,215 Classes scheduled in OCM classrooms per year

308,973
Students Enrolled in OCM-supported classrooms

90 Technology Upgrades per year across all classrooms

Funding

Our high level of satisfaction has been consistent over the last couple years. However, our funding falls short compared to maintenance and replacement costs. This budget trend makes it difficult for us to maintain our learning spaces and implement new and improved experiences for our students, faculty, and staff.
